

STILL STANDING

The recent years have been tough for our members at Hawker Beechcraft, as we have faced layoffs, outsourcing, insourcing and the unknown. Those of us fortunate enough to have retained our jobs have been saddened to watch our brothers and sisters lose their jobs, through no fault of their own. Those of us still standing continue to face the unknown.

The good news is the State of Kansas has provided funding to assist Hawker Beechcraft. Your Union is working to ensure that our members will benefit from this funding for further education, training and retraining.

With our contract expiring in August, we are already preparing for negotiations. It's time to get ready! In the near future, we will distribute surveys so that your negotiating committee can hear from you, our members. We must stand united as we have in the past and move toward the future.
